Subject: From Laura Dern (letter of support)

Dear Senator Hill:

As a group of artists, parents, and environmentally concerned California citizens, we are so grateful for Senate Bill 47. We strongly support a ban on all new waste tire infills for a two-year period in the hope of getting clearer evidence of the impact on human health.

As we watch our own children and grandchildren being required to play on these surfaces in playgrounds and public and private schools throughout this state, we have become more and more alarmed. The list of carcinogens found in these fields alone should give us pause enough.

As concern grows and bans are introduced throughout the country, we hope that California will continue to be one of the leaders in the charge to consider the environmental impact and the protection of human, and particularly our children's, health as a top priority over all else.

Thank you for this protection.

With immense gratitude,

Sheryl Crow
